## P R E F A C E .

---

THIS volume contains a Catalogue of the Coins of Ancient Italy in the British Museum, arranged according to the system of Eckhel.

The metal of each coin is stated, and its size, in inches and tenths. The weight is given in English grains of all gold and silver coins and of all copper coins of known denominations. Tables for converting grains into French grammes and inches into millimètres, as well as into the measures of Mionnet's scale, are placed at the end of the volume. (Pp. 430, 432.)

The coins of the class of *Æs Grave* not engraved in the "*Æs Grave del Museo Kircheriano*," and those of all other classes not engraved in Carelli's "*Numorum Italiæ Veteris Tabulæ*," have been for the most part engraved on wood, and each illustration placed after the corresponding description.

I have to acknowledge the valuable assistance I have received, in the preparation and revision of the Catalogue, from Mr. Head, Assistant Keeper, and Mr. Gardner, Assistant, in the Department of Coins and

Medals. I am also indebted to Mr. Vaux, for the aid which he rendered me when he was Keeper of the Department of Coins, in all matters connected with the illustrations.

The next volume, containing the Coins of Sicily, is in progress.

REGINALD STUART POOLE.
